Content Start: Note: These tables include examples and notes related to the Performance Explorer task even in an earlier version of the Performance Creation task. Starting in the 2021 exam, the assessment throughout the course will include an updated version of the performance-only task - there will be no Performance Explorer job. If you are using assistive technology and need help accessing these PDFs in a different format, contact the services for students with disabilities 212-713-8333 or [ssd@info.collegeboard.org](mailto:ssd@info.collegeboard.org). 2019: Sample Responses and Investigative Scoring Guidelines – Sample Responses Create – Sample Comments Scoring Commentary Guidelines Explore: ArtifactExplore A: Written Response To Investigate B: ArtifactExplore B: Written Response To Investigate C: ArtifactExplore C: Written Response Explore D: ObjectExplore D: Written Response to Investigate E: ObjectExplore E: Written Response to Investigate F: ObjectExplore F: Written Response to Explore G: ObjectExplore G: Written Response H: ArtifactExplore H: Written Response to Investigate I: Object Explore I: Written Response To Investigate J: ArtifactExplore J: Written Response Create: VideoCreate A: Written Response Create B: VideoZor B: Written Response Create C: VideoCreate C: Written Response Create D: VideoCreate D: Written Response Create E: VideoCreate E: Written Response Create F: VideoZor F: Written Response Create G: VideoCreate G: Written Response Create H: VideoCreate H: Written Response Create H : VideoCreate H: Written Response Create F: VideoZor F: Written Response Create: VideoCreate G: Written Response Create H: VideoCreate H: VideoCreate H: Written Comment Create I: VideoCreate I: Written Response Create J: VideoCreate J: Written Response Scoring Guidelines Main Reader Explore: Commentary Create: Interpretation Scoring Distribution 2017: Sample Comments and Scoring Guidelines Scoring with 2018 Sea Ruble Explore – Sample Responses Create – Sample Comments Scoring Guidelines and Commentary Comments Explore A: ObjectsThis: Written Response To Explore B: Objects: ObjectGlal C: Written Response Explore D: Object Investigate D: Written Response To Investigate E: ArtifactExplore E: Written Response Create: VideoZor A: Written Response Create B: VideoZor B: Written Response Create C: Written Response Create D: Video Create D : : VideoCreate E: Written Response Create F: VideoCreate F: Written Response Create G: VideoCreate G: Written Response create H VideoCreat H: Written Response Create I: VideoCreate I: Written Response Create J: VideoCreate J: Written Response Explore: Score Guidelines and Comments Create: Score Guidelines and Comments Explore: Commentary Create: Commentary Fiveable community students have been meeting new members, starting study groups, and sharing tons of opportunities Soon the 5able community will be on A new platform where you can share, save, and organize your learning links and lead study groups among other students!  APAugust 24, 2020geevarcb AP Computer Science Principles is an introductory college-level computing course that shows students across the field of computer science. Students learn to design and evaluate solutions and implement computer science to solve problems by developing algorithms and programs. They combine abstraction in programs and use data to discover new knowledge. The students also explain how computing innovations and computing systems—including the Internet—work, explore their potential impacts, and contribute to a collaborative and ethical computing culture. The exam consists of the performance-making task and the AP test at the end of the course. The performance-generating task requires at least 12 hours of dedicated class time for students to complete. The end-of-the-road exam is two hours long and includes 70 multiple-choice questions. 70 Multi-Choice Questions | 120 min | 70% of Zion | 4 answer options 57 one choice 5 one choice 5 one choice with a reading pass on computing innovation and 8 multiple options: Select 2 answers and 30% of score students will develop a computer program of their choice. Students need at least 12 hours of class time to complete. Download AP Computer Science Principle Practicing Test PDF AP Computer Science Principles Course & PDF Description Test – Official Teacher 2020 has approximately 70-80 MC practice online. If enough people want to

practice, I'll put up a Google document, copy the Q&A and share them with those who answer. Edit: Ok I'll start it now, I'll add as I go. The link will be added for a moment. Link: I'm going through this starting at 5:50pm EST and adding in the process. It's a little tricky to do that and I have to leave out questions with pictures, but at least half the questions are tinged. Page 2Published by 3 years ago 16 comments before you write one line of code in AP® Computer Science Principles, start your program with a collaborative design process. After careful discussion and planning, an iterative development process leads your program to completion, ensuring it meets the needs of those who ultimately use it. Find out what's at the heart of computing: data. Start with the basic representation of data in bits and increase data usage within programs. In ® AP principles, data is a primary way in which we communicate! When you make decisions like which route to take to school or choose which computer science principles assignment ® AP to perform first, you're likely using an algorithm. Algorithms enable data abstraction that enables the construction of useful programs. You use the Internet to search for information, socialize with friends, and even practice computer ® principles. Learn about its basic characters And how this vast network of computing devices works. The Internet has shaped our modern world. Computing devices are everywhere: our homes, our pockets, and even scientific principles lessons ® world. With all the benefits that computing brings, there are also hazards that require our perseverance and attention. © 1996-2014, Amazon.com, Inc. or its ap computer science principles test partners have two parts: the performance-making mission - which will complete throughout the year and be sent online for scoring through ap's digital portfolio - and the end-of-course test of multiple choice. Both measure your skill in course methods and content, and both contribute to your final AP score on a scale of 1-5. Exam components In this part of the test, you will develop a computer program that you choose: a program that solves a problem, enables renewal, or helps you express personal interests. You will be given a minimum of 12 hours of class time to complete the task. You will send these items using the AP Digital Portfolio application for scoring: a video of your program running individual written comments about the program and your development process plan code The multiple selection test at the end of the course is a written examination in paper and pencil. It contains three types of multi-option questions: one multiple choice: Select one answer from 4 single choices with a read transition about computing renewal: Select one answer from 4 options. Multiple choice: Select 2 answers from 4 mission options to create performance, as the end of a given test course in May, is scored by the College Board. The score is done by skilled and experienced educators called AP readers. Your overall test score is based only on the number of questions answered correctly. Points are not deducted for incorrect answers or unanswered questions. Questions.
